Figure 1 is a schematic diagram of a light-emitting device. The top part shows a cross-sectional view of the device. It consists of a light-emitting layer (1a) and a light-receiving layer (1b) separated by a substrate (1c). The light-emitting layer (1a) is shown with a cross-hatched pattern, and the light-receiving layer (1b) is shown with a diagonal hatched pattern. The substrate (1c) is a solid rectangular block. The bottom part shows a perspective view of the device. It consists of a light-emitting side (80) and a light-receiving side (80c). A point A is marked on the light-receiving side, and a distance 'a' is indicated between the light-emitting side and point A.
